Production

- Seut Maritime AS.
- We are located in central and up to date facilities in Fredrikstad.
- Together with our Engineering Company SAVEMA Engineering as.
- Our workshop are placed in ground floor with very good internal and external accessibility.

Blind valves SA2 - SA3 - SA4

- We manufacture valves in:
- A-216 WCB(Carbon steel SA-2).
- AISI 317L(Stainless SA-3)
- In SA-4(SA-2 house and AISI 316L inserts).
- From DN50(2") to DN750(30").

Our CNC Milling Centre

Centre can machine/mill/drill and thread, from DN50 to DN500 PN25 with great accuracy and speed.

Office

Our office are located in 2 floor with online to our CNC machines regarding programming and supervision.

**Our Managing
Director
Torbjørn Kjølvik**

He have over 40 years
experience from ship and
offshore equipment.

Our Technical Department

Take care of all technical
changes and updates for
Production and Consumers.

Workshop

Our experienced crafts men also use manual milling machines where that will be rational i.e. small series and special requirements.

Cutting raw material goes automatically in our programmable cutting machine.

We deliver valves&spare parts with our own transport to Sea and Airports in Norway, we have 24 hours Spare Parts delivery World Wide.

We produce ca 2000pcs valves pr. year with help
our CNC centres and skilled craftsmen.
